

IN THE CLAIMS:

The current claims follow. For claims not marked as amended in this response, any difference in the claims below and the previous state of the claims is unintentional and in the nature of a typographical error.

1. (Currently Amended) A method ~~for filtering electronic mail~~, comprising:
receiving, in a data processing system, an electronic mail message;
determining if the electronic mail message includes an intro-word;
if the electronic mail message includes the intro-word, then delivering the
electronic mail message and adding an address corresponding to a sender of the electronic
mail message to a list of valid senders ~~if the electronic mail message includes the intro-~~
~~word~~; and
storing the electronic mail message ~~if the electronic mail message does not~~
~~include the intro word~~ if the electronic mail message is not delivered.
2. (Currently Amended) The method of claim 1, wherein the intro-word is located in a subject line of the electronic mail message.
3. (Currently Amended) The method of claim 1, ~~further comprising delivering the~~
~~electronic mail message~~ wherein the electronic mail message is also delivered if the email address of a sender of the electronic mail message is on an authorized sender list.
4. (Currently Amended) The method of claim 1, ~~further comprising delivering the~~
~~electronic mail message~~ wherein the electronic mail message is also delivered if the domain name of a sender of the electronic mail message is on an authorized domain list.

5. (Original) The method of claim 1, further comprising, if the electronic mail message does not include the intro-word, then sending a confirmation message to the sender of the electronic mail message.
6. (Original) The method of claim 5, further comprising:
receiving a response mail message corresponding to the confirmation message;
delivering the electronic mail message if the response mail message includes the intro-word; and
storing the electronic mail message if the response mail message does not include the intro-word.
7. (Currently Amended) The method of claim 5, further comprising:
receiving a response corresponding to the confirmation message via an ~~internet~~
Internet connection;
delivering the electronic mail message if the response includes the intro-word; and
storing the electronic mail message if the response does not include the intro-word.
8. (Original) The method of claim 5, further comprising sending an obscured image of the intro-word to the sender.
9. (Currently Amended) The method of claim 5, further comprising sending the intro-word to the sender in a ~~non-machine-readable~~ non-computer harvestable form.
10. (Original) The method of claim 1, further comprising deleting the stored electronic mail message after a predetermined amount of time.

11. (Currently Amended) A data processing system ~~having~~ comprising at least a processor and accessible memory, ~~comprising~~; the data processing system configured to ~~means for receiving, in the data processing system,~~ receive an electronic mail message;
- ~~means for determining~~ determine if the electronic mail message includes an intro-word;
- ~~means for delivering~~ deliver the electronic mail message and add an address corresponding to a sender of the electronic mail message to a list of valid senders if the electronic mail message includes the intro-word; and
- ~~means for storing~~ store the electronic mail message ~~if the electronic mail message does not include the intro-word~~ if the electronic mail message is not delivered.
12. (Original) The data processing system of claim 11, wherein the intro-word is located in a subject line of the electronic mail message.
13. (Currently Amended) The data processing system of claim 11, ~~further means for comprising delivering~~ wherein the data processing system is further configured to deliver the electronic mail message if the email address of a sender of the electronic mail message is on an authorized sender list.
14. (Currently Amended) The data processing system of claim 11, ~~further comprising means for delivering~~ wherein the data processing system is further configured to deliver the electronic mail message if the domain name of a sender of the electronic mail message is on an authorized domain list.
15. (Currently Amended) The data processing system of claim 11, ~~further comprising means for sending~~ wherein the data processing system is further configured to send a confirmation message to the sender of the electronic mail message if the electronic mail message does not include the intro-word.

16. (Currently Amended) The data processing system of claim 15, ~~further comprising:~~
wherein the data processing system is further configured to
~~means for receiving~~ receive a response mail message corresponding to the
confirmation message;
~~means for delivering~~ deliver the electronic mail message if the response mail
message includes the intro-word; and
~~means for storing~~ store the electronic mail message if the response mail message
does not include the intro-word.
17. (Currently Amended) The data processing system of claim 15, ~~further comprising:~~
wherein the data processing system is further configured to
~~means for receiving~~ receive a response corresponding to the confirmation message
via an ~~internet~~ Internet connection;
~~means for delivering~~ deliver the electronic mail message if the response includes
the intro-word; and
~~means for storing~~ store the electronic mail message if the response does not
include the intro-word.
18. (Currently Amended) The data processing system of claim 15, ~~further comprising~~
~~means for sending~~ wherein the data processing system is further configured to send an
obscured image of the intro-word to the sender.
19. (Currently Amended) The data processing system of claim 15, further comprising
means for sending the intro-word to the sender in a ~~non-machine-readable~~ non-computer
harvestable form.
20. (Currently Amended) The data processing system of claim 11, ~~further comprising~~
~~means for deleting~~ wherein the data processing system is further configured to delete the
stored electronic mail message after a predetermined amount of time.

21. (Currently Amended) A computer program product tangibly embodied in a machine-readable medium, comprising:
- instructions for receiving, in a data processing system, an electronic mail message;
 - instructions for determining if the electronic mail message includes an intro-word;
 - instructions for delivering the electronic mail message and adding an address corresponding to a sender of the electronic mail message to a list of valid senders if the electronic mail message includes the intro-word; and
 - instructions for storing the electronic mail message ~~if the electronic mail message does not include the intro-word~~ if the electronic mail message is not delivered.
22. (Original) The computer program product of claim 21, wherein the intro-word is located in a subject line of the electronic mail message.
23. (Currently Amended) The computer program product of claim 21, further comprising instructions for delivering the electronic mail message also if the email address of a sender of the electronic mail message is on an authorized sender list.
24. (Currently Amended) The computer program product of claim 21, further comprising instructions for delivering the electronic mail message also if the domain name of a sender of the electronic mail message is on an authorized domain list.
25. (Original) The computer program product of claim 21, further comprising instructions for sending a confirmation message to the sender of the electronic mail message if the electronic mail message does not include the intro-word.

26. (Original) The computer program product of claim 25, further comprising:
instructions for receiving a response mail message corresponding to the
confirmation message;
instructions for delivering the electronic mail message if the response mail
message includes the intro-word; and
instructions for storing the electronic mail message if the response mail message
does not include the intro-word.
27. (Currently Amended) The computer program product of claim 25, further
comprising:
instructions for receiving a response corresponding to the confirmation message
via an ~~internet~~ Internet connection;
instructions for delivering the electronic mail message if the response includes the
intro-word; and
instructions for storing the electronic mail message if the response does not
include the intro-word.
28. (Original) The computer program product of claim 25, further comprising
instructions for sending an obscured image of the intro-word to the sender.
29. (Currently Amended) The computer program product of claim 25, further
comprising instructions for sending the intro-word to the sender in a ~~non-machine-~~
~~readable~~ non-computer harvestable form.
30. (Original) The computer program product of claim 21, further comprising
instructions for deleting the stored electronic mail message after a predetermined amount
of time.
